played itself out. Mrs. Leboeuf and Dr. Dreher decided that the former's husband was standing in the way of their happiness. On the night of July 1, 1927 they invited the unsuspecting husband to accompany them on a picnic,

lured him into a rowboat on a fishing lake, and shot him from another boat. James Beadle, an old trapper of the lake country, helped them slit Leboeuf's abdomen, fill it full of weights and sink it to the bottom

f the lake. Beadle was convicted of murder in the first degree for his part in the crime, mainly the loan of his hun'ing knife, and was senit to prison for life. Mrs. Leboeuf and the doctor, because of their malicious intent,

Why some children are peevish.

Happy disposition easily recovered.

Some children are liable to get bilious and irritable, just as grownups often do. It is easily remedied. Simply give a dose of "California Fig Syrup," and in a few hours the bowels will move, the liver will be relieved and all pent-up bile and sour, constipated waste removed, eaving the system clean and sweet and the child bright and energetic

"California Fig Syrup" banishes biliousness and constipation, regulates the bowels and insures pure a clear complexion, joyous spirits, a keen brain, healthy appetite and aids sturdy growth.

To get the genuine California Fig Syrup, endorsed by physicians for 50 years, look for the name "California" on the package.

The statistics of commerce and finance prove that our prosperity is legitimate and is founded on the increasing pro- eally incurable, for a man's not ducing power of American genius (mass production); colossal earning power (in higher wages); enormous consuming power (our enlarged home markets). Beware of COLDS NOW

whether you've had the FLU... or not

This is the time of year when serious cold troubles, such as deep chest colds, bronchitis, and pneumonia are always at their worst.

Just now, with so many people in the weakened condition that follows a flu attack, it is more important than ever to heed every cold as a danger signal and check it promptly before complications can set in.

Quick Direct Treatment

At the first sign of a cold, melt some Vicks in a bowl of hot water and inhale its healing vapors. Also place some up each nostril and snuff well back. This quickly opens the air passages.

At bedtime, rub Vicks vigorously over throat and chest and cover with a warm flannel. Most coids yield overnight to Vicks two-fold action:

Acts 2 Ways at Once

(1) Its medicated vapors, released by the warmth of the body, are inhaled direct to the inflamed air passages, loosening the phlegm and easing the difficult breathing.

(2) At the same time, Vicks acts through the skin like a poultice, "drawing out" tightness and soreness, and thus helping the vapors to break up the congestion. Mothers especially appreciate this simple

external treatment because it cannot upset children's delicate stomachs, as too much "dosing" is so apt to do.

Beware of COLDS NOW!

whether you've had the FLU... or not

This is the time of year when serious cold troubles, such as deep chest colds, bronchitis, and pneumonia are always at their worst.

Just now, with so many people in the weakened condition that follows a flu attack, it is more important than ever to heed every cold as a danger signal and check it promptly before complications can set in.

Quick Direct Treatment

At the first sign of a cold, melt some Vicks in a bowl of hot water and inhale its healing vapors. Also place some up each nostril and snuff well back. This quickly opens the air passages.

At bedtime, rub Vicks vigorously over throat and chest and cover with a warm flannel. Most coids yield over-night to Vicks two-fold action:

Acts 2 Ways at Once

(1) Its medicated vapors, released by the warmth of the body, are inhaled direct to the inflamed air passages, loosening the phlegm and easing the difficult breathing. (2) At the same time, Vicks acts through the skin like a poultice, "drawing out" tightness and soreness, and thus helping the vapors to break up the congestion.

> Mothers especially appreciate this simple external treatment because it cannot upset children's delicate stomachs, as too much "dosing" is so apt to do.
